

# Silver Bullet

## Micrometer replacement actuators

- Not rotating 6mm diameter tip
- stepper motor
- precision home sensor
- 13mm, 26mm and 52mm stroke
- sub-micron resolution
- compact and narrow

Silver Bullets are the best micrometer replacement solution when you need to motorize a manual stage or when you simply need a narrow, compact, stiff and accurate motorized actuator. Silver Bullets are driven by stepper motors and integrate home reference switch, they are available with three strokes: 13mm, 26mm and 52mm. The mounting interface is the standard 9.5mm shaft with fixing ring. When you need to work in extreme environments then you can rely on Silver Bullet eXtreme. See the dedicated data sheet.

code	stroke	min. incremental motion	repeatability	Max. axial load
SB-13	13mm	0.1um	+/- 1um	30N
SB-26	26mm			
SB-52	52mm
